

**FULLTECH
INSTRUMENTS**

The SMART way for your lab

COMPANY PROFILE

The Smart way for your Lab

About us ...

Fulltech Instruments srl was founded in 2004 by the desire of the founding partners to find in the world market products that could be a valid, reliable and economical alternative to the usual brands. In recent years, **Fulltech Instruments** has begun to produce and distribute its own instrumentation around the world to meet increasingly specific needs.

After almost 20 years from its formation and with more than 40 years of experience of its founders in the sale and specialized technical assistance, **Fulltech Instruments** has become one of the main players in the Italian and international analytical instrumentation market.

Core Business

Fulltech Instruments srl imports, supports, produces and distributes directly chemical analysis instruments and without intermediaries from more than 15 countries and it is specialized in products from the Far East.

Direct interaction with manufacturers allows us to have the best price / performance ratio in the market.

Fulltech Instruments is one of the few Italian companies based in Beijing that is able to quickly supply spare parts, consumables and warranties, thanks to the experience of its staff, specialists and refresher courses in Chromatography, Spectrometry, Sample Preparation and Laboratory Management.

Our main activities

TURNKEY LABS WORLDWIDE

From the small analyzer to the turnkey laboratory, **Fulltech Instruments** is able to directly satisfy many of the needs of its customers.

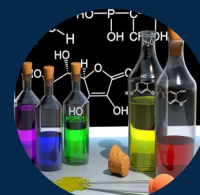

The experience accumulated over the years allows us to support customers with services including Global Procurement or Laboratory Management

SUPPORT TRAINING ASSISTENCE

Few companies in the sector are able to provide a 360° service like **Fulltech Instruments** which includes:

- Specific courses on analytical techniques
- Development of analytical methods Instrumental
- Certification for the purposes of accreditation and maintenance contracts

DESIGN PRODUCTION

Fulltech Instruments designs, manufactures and distributes worldwide own analytical instrumentation

The C18Lab jaw mill, the TIGER S100 crusher and the new line of gas generators GENius are the latest creations introduced on the market.

Main Product Lines

SPECTROMETRY

Benchtop UV-Vis-Nir spectrophotometers, Fiber-optic UV-Vis-Nir spectrophotometers, Color spectrophotometers—Colorimeters, Water Quality Measurement

CHROMATOGRAPHY

Laboratory Information Management System (LIMS), Gas Chromatography, Headspace , Purge & Trap and Thermal Desorption Samplers, HPLC and IC, Columns and Consumables for GC, HPLC and

GAS GENERATION NITROGEN, AIR, HYDROGEN

Hydrogen generators for GC and GC-MS, air and zero air generators with chromatographic quality, PSA nitrogen generators for GC and LC-MS

ULTRACE METAL ANALYZERS

Atomic Fluorescence Spectrometers for the analysis of Mercury, Arsenic, Antimony, Selenium, Tin, Lead, Cadmium, etc. at the ppt level

PRODUCTION OF PURE AND ULTRAPURE WATER

Water treatment systems for laboratory and industrial use, type I, II and III water according to Norm ASTM

ELEMENTAL ANALYZERS

Chlorine, sulfur and nitrogen analyzers, TOC analyzers for high and low concentrations, AOX analyzers, CHNOS analyzers, adiabatic calorimetric pumps

PORTABLE GAS ANALYZERS

Portable Gas Chromatographs, Biogas and Syngas Analyzers

SAMPLE PREPARATION – Digestion, Extraction

Atmospheric pressure digestion and microwave mineralization systems, Kjeldhal Digestors, Crude Fiber Extractors, Soxhlet Extractors

SAMPLE PREPARATION – Grinding

Laboratory Mills, Jaw Mills, Knife Mills, Oscillating Mills, Vibratory Mills, Centrifugal Mills, Planetary Mills, Cryogenic Ball Mills, Disc Mills, Homogenizers

SAMPLE PREPARATION – Purification

Centrifugal concentrators, SPE manifolds, Automatic SPE Sample Preparation, Nitrogen concentrators, Rotary evaporators, Freeze dryers

TURNKEY LABORATORY SOLUTIONS

From the conceptualization of the idea and the design to the optimization and implementation we build the laboratory together with you starting from the furniture to reach the training courses in instrumentation with quality and safety.
